Software Engineer specializing in end-to-end Full Stack development, from initial architecture to final deployment. Open to remote, hybrid, or relocation.

EDUCATION

SEPT 2022 - JUN 2024 | **CIFP César Manrique**, Santa Cruz de Tenerife
Higher Technician in Software Development
Specialty: Design and development of Full Stack applications

SEP 2025 - ONGOING | **Universitat Oberta de Catalunya**
Bachelor of Computer Science
Minor: Software Engineering

SKILLS

LANGUAGES: Python, C#, Java, TypeScript
FRAMEWORKS: FastAPI, ASP.NET Core, Spring Boot, NestJS, React, Next.js
SOFTWARE: Docker & Compose, Kubernetes, SQL (Postgres, SQL Server), Redis, Uptime Kuma, GitHub Actions, SonarQube, Pytest, Cypress, Figma
CONCEPTS: Containerization, CI/CD, Unit, E2E & Integration Testing, Agile Methodology, Technical Documentation, Conventional Commits

WORK EXPERIENCE

JUL 2024 - PRESENT | **Software Developer**
DST

- Developed and maintained multiple **FastAPI** microservices within a large-scale international project, contributing to a **React** frontend and configuring **Docker** environments for service containerization.
- Developed **1000+ tests with pytest** to validate API and business logic, achieving over **90% code coverage** ensuring reliability.
- Designed and developed a multi-office employee **QR check-in system**, integrating **Raspberry Pi** devices via **MQTT**, backend APIs, centralized logging, and external synchronization with the company's **Azure EntraID** platform to track building occupancy.
- Engineered a data scraping pipeline using **Node.js** with **Puppeteer** and **Playwright** to extract and analyze public project data from Italian government sources.
- Orchestrated the technical recruitment and onboarding process, including interviewing candidates and coordinating internship programs with educational centers.

MAR 2024 - MAY 2024 | **Web Developer Erasmus Intern**
S.T.E.P. S.R.L.

- Managed the redesign of the corporate website using **Next.js**, documenting every stage following industry standards.
- Developed comprehensive UI/UX design projects in **Figma** for interface planning and creation.
- Coordinated a development team of 5 people using **Trello** and **Agile** methodologies.
- Implemented a **RESTful** API utilizing Large Language Models (LLM) and Text-to-Speech (TTS) technology.

PROJECTS

Apuntex apuntex.com 

- Planned **features** and **technical requirements**, coordinating frontend delivery and assessing quality.
- Built a **React** frontend with **TanStack Start**, Tailwind CSS, and shadcn/ui for workspace and AI study workflows.
- Deployed with **Docker Compose** through **Coolify**, configuring CI/CD and automatic GitHub deployments.

Izbri Projects projects.izbri.com 

- Built and deployed a bilingual portfolio and uptime dashboard for applications managed through **Coolify**, configuring **Docker Compose**, CI/CD, and automatic resource synchronization.
- Implemented independent uptime monitoring, incident notifications, and **Sentinel** server telemetry, securing administration with **GitHub OAuth** and **Cloudflare Access**.
